UNITED STATES DEPARTMENT OF AGRICULTURE

Bureau of Agricultural Economics and Farm Security Administration

Employment Situation of Agricultural Workers Living in FSA Migratory Labor Camps

Current Report No. 6

Arizona-California Camps, June 15 to July 13, 1940

* These averages include all workers and all families.

Camps designated by:

- A. Western Oregon
- B. Eastern Oregon & Southern Idaho
- C. Yakima, Washington

- D. Imperial & Coachella Valleys
- E. Northern California
- F. Arizona
- G. San Joaquin Valley

Berkeley, California

August 21, 1940

Employment Situation of Agricultural Workers Living in FSA Migratory Labor Camps.

Arizona, California, Oregon, Washington, Idaho.

June 15 to July 13, 1940.

The data for these reports are supplied from a ten per cent sample of all the families in the camps. An entirely new and different sample is selected every week. All members of each household who are working or seeking work are reported upon with regard to their employment activities during the week in which the particular family is included in the sample.

NORTHWEST CAMPS ARE ADDED TO THE REPORT

This current summary, for the first time, includes the employment situation of the camps in Oregon, Washington, and Idaho---the camps of Region XI of the Farm Security Administration. This expansion of the report is fortunate in that it permits a complete Pacific Coast coverage and, at the same time, facilitates interregional comparisons.

It is anticipated that the next current report will be able to offer a more complete analysis of public assistance employment received by workers living in FSA camps.

Table 1.
